### Things to do today

O1 Finish development environment

Codespaces (for 004)

**O2** Upload folders & files to your github

https://github.com/prof-kweon/C-Language-Course/blob/main/LectureReference/Howto-github.md

**O3** Register Codyssey & A/B group → Weekly schedule

O4 Codyssey (how to evaluate & review)

### Think over

Implement your own program that will display the word "woof woof" when you type "dog" on the computer. Your program must support cross-platform and be stored in the cloud.

### Homework

1. Read Step 1, Course 1, Problem 1

# See you next week! DO NOT miss the classes
